DETAILED ACTION

1. Claims 1-36 are pending and presented for examination.
2. Applicant's amendment and response filed on 28 April 2006 has been entered and considered.
3. Claims 1, 6, 10, 15, 19, 24, 28, and 33 have been amended.

Allowable Subject Matter

4. Claims 1-36 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The prior arts of record fail to teach or render obvious a method for a network management system to identify active and standby states of plural routers within a virtual router in a network. In particular, the obtaining of first information from a first router and a second router of a virtual router, the first information comprising group priority information and group standby state information, as well as producing a topology of the network identifying the active and standby states to display the health of the virtual router at the network management system based on the obtained first information as claimed by the instant invention is not taught or fairly suggested by the prior arts of record. The limitations of claims 1, 6, 10, 15, 19, 24, 28, and 33 in combination with the other elements and features of the instant invention are not taught or fairly suggested by the teachings of prior art. Furthermore, evidence for modifying the prior art teachings by one of ordinary skill level in the art was not uncovered so as to result in the invention as recited in claims 1-36.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2125

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
